MORE INFO

CONTROL THE SWEEP

Select 3- or 5 hose connection to fit your tool carrier's specification. The sweep is controlled either directly from the tool carrier's controls (5-hose connection) or by an electronic switch box (3-hose connection).

STABLE SWEEP

All FSI stump grinders with integrated sweep function are built with adjustable sweep speed and two-hydraulic cylinder to secure a stable sweep and equal speed in both directions.

THE CHOICE IS YOURS

Maximise the versatility of your tool carrier by adding a stump cutter as a tool. The HxxS series comes in 6 variants and is compatible with tool carriers, loaders, and similar ranging from 2 to 3.5 tonnes.

WORK AREA

Grind stumps with difficult access or on slopes. Cover up to 118 cm in one sweep, depending on the model, and efficiently grind away any stump.

SIMPLE ATTACHMENT

The stump grinder is attached to the tool carrier using a fixture. As standard it is supplied with an uncoated back plate for welding on a suitable attachment
